

PRO+ Panel
28W 130Lm/W 4000K
Item: 1001938

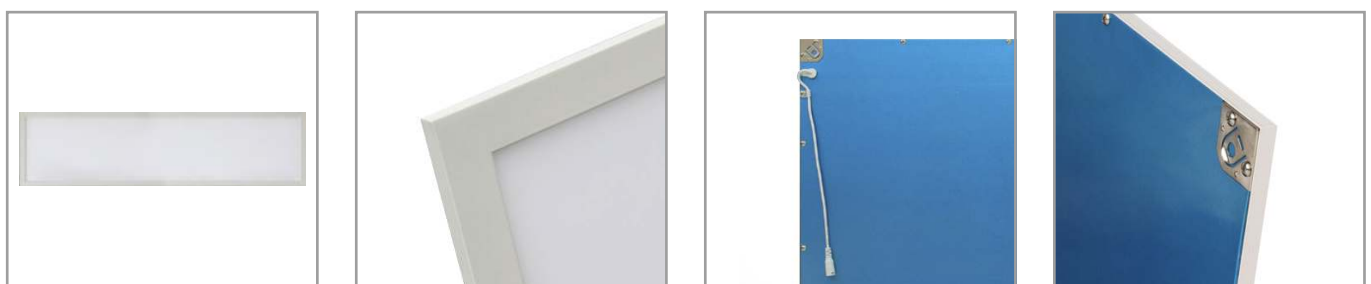

Panel

LED Flatlight: We only want to deliver top quality. That's why all of our panels have a non-flicker driver. A non-flicker driver makes the light feel more comfortable for your eyes. With the naked eye, this blinking / flickering does not occur, but unknowingly you may be affected by it. Created a healthier work environment with our panels.

Applications: Office, school, Hospital, Retail shops, Hotel, Workshop
